  - Toggl Plan

# Atlassian JIRA

# Atlassian JIRA

---

- No doubt, Atlassian JIRA is one of the **best project management tools** used by Agile teams.
- Ideal for most offices.
- Mainly- **IT professionals, institutional designers, working in a shared environment.**

# JIRA - Tool Features:

- **Customizable Scrum Boards** that can make to fit according to your team's workflow. These scrum boards are used to visualize all the work in a sprint. Any backlog moves automatically to the newsprint.
- **Flexible Kanban boards** for continuously **delivering maximum output at minimum effort**.
- **Out of the box agile reporting** that shows the real-time image of the sprint with the help of burnout chart, sprint report, a cumulative flow diagram, velocity chart, epic report, release burn down, etc.
- Custom filters using **JIRA Query Language (JQL)**.
- Developer tool integrations.
- **1000+ add-ons**.
- **Rich APIs**.
- On the go mobile apps that ensure an uninterrupted flow of work.
- Customizable workflows.

# JIRA

## Pros:

---

- It is **highly extensible** and **extremely customizable** as per your project needs.
- It is a mature and proven product used by thousands of big companies around the globe. So, it has a **large and active community**.
- A lot of **out of the box features** bring in long-term benefits to the project.
- **Very helpful for start-ups** as it is cheap for small teams.

## Cons:

- It is **hard to setup** and takes a long time to learn using it properly.
- Many **core features** are available only as paid add-ons.
- Too many features make it **complex** to use for some teams at times.

## Price Details:

- **Cloud:** \$10 per month for up to 10 users for small teams and \$75 per month for up to 15 users for growing teams.
- **Self-hosted:** \$10 as a one-time payment for 10 users on the server and \$12,000 per year for 500 users on Datacenter.

# Active Collab

# Active Collab

---

- This is yet **another powerful agile project management tool**.
- **Ideal for small businesses.**

# Active Collab

## Tool Features:

- **Task management:** All the work is at one place. We can track all the updates by looking at the dashboard.
- **Task filtering:** Immediately searches what you want.
- **Seamless workflow**
- **Adapts to your workflow**
- **Email integration**
- Great **team collaboration** with the features like **All-in-one calendar**, @mentions, and collaborative writing.
- **Time tracking:** Log time on projects, the timer app, time tracking reports.
- Also, offers invoicing features.

# Active Collab

## Pros:

- Quick and easy to use.
- A reliable tool with a lovely interface.
- Rich features with moderate price.

## Cons:

- Does not have sprint planning option.
- Have few issues with customization.

## Pricing Details:

- Cloud: \$25/month for 5 members with 5GB space and \$299/month for any number of members with 500 GB space.
- Self-Hosted: \$999 a one-time payment.

# Agilo for Scrum

# Agilo for Scrum

---

Ideal for teams that require powerful communication.

# Agilo for Scrum

---

## Tool Features:

- Offers real-time intuitive workflow for Agile projects.
- Organizes the product backlog efficiently with features like user stories, higher level themes, prioritization, and overview on product ongoing process.
- Supports sprint planning 1 & 2.
- Estimate your sprint.
- Real-time scrum board
- One click approval of completed stories.
- Retrospective.

# Agilo for Scrum

---

## Pros:

- Ideal for **distributed teams**
- Well priced
- **Great communication system**

## Cons:

- **No mobile app**
- **Cannot host more than one project**
- Few people have found it difficult to learn

## Pricing:

- **€ 10/month for single teams** and **€ 20 per month for multiple teams.**

# SpiraTeam by Inflectra

- SpiraTeam® is a **complete agile software development management** system that **manages your project's requirements, releases, iterations, tasks and bugs/issues**.
- Designed specifically to **support agile methodologies** such as **Scrum, Extreme Programming (XP), DSDM** and Agile Unified Process (**AUP**).
- It **allows teams to manage all their information in one environment**.

# Pivotal tracker

## Pros:

---

- User-friendly.
- Also available on iPad.
- Offers a lot of integration options to extend the functionality.
- All the main things can be tracked on a single page view.

## Cons:

- Somewhat expensive
- Difficult to maintain dashboard for a large team.

## Pricing:

- Free for team size up to 3.
- Free for public projects, educators & non-profits.
- Startup: \$12.50/month for 5 collaborators & \$29.10/month for 10 collaborators.
- Pro: \$62.50/month for 15 collaborators, \$125.00/month for 25 collaborators & \$250.00/month for 50 collaborators

# Microsoft Visual Studio Team Services(VSTS)

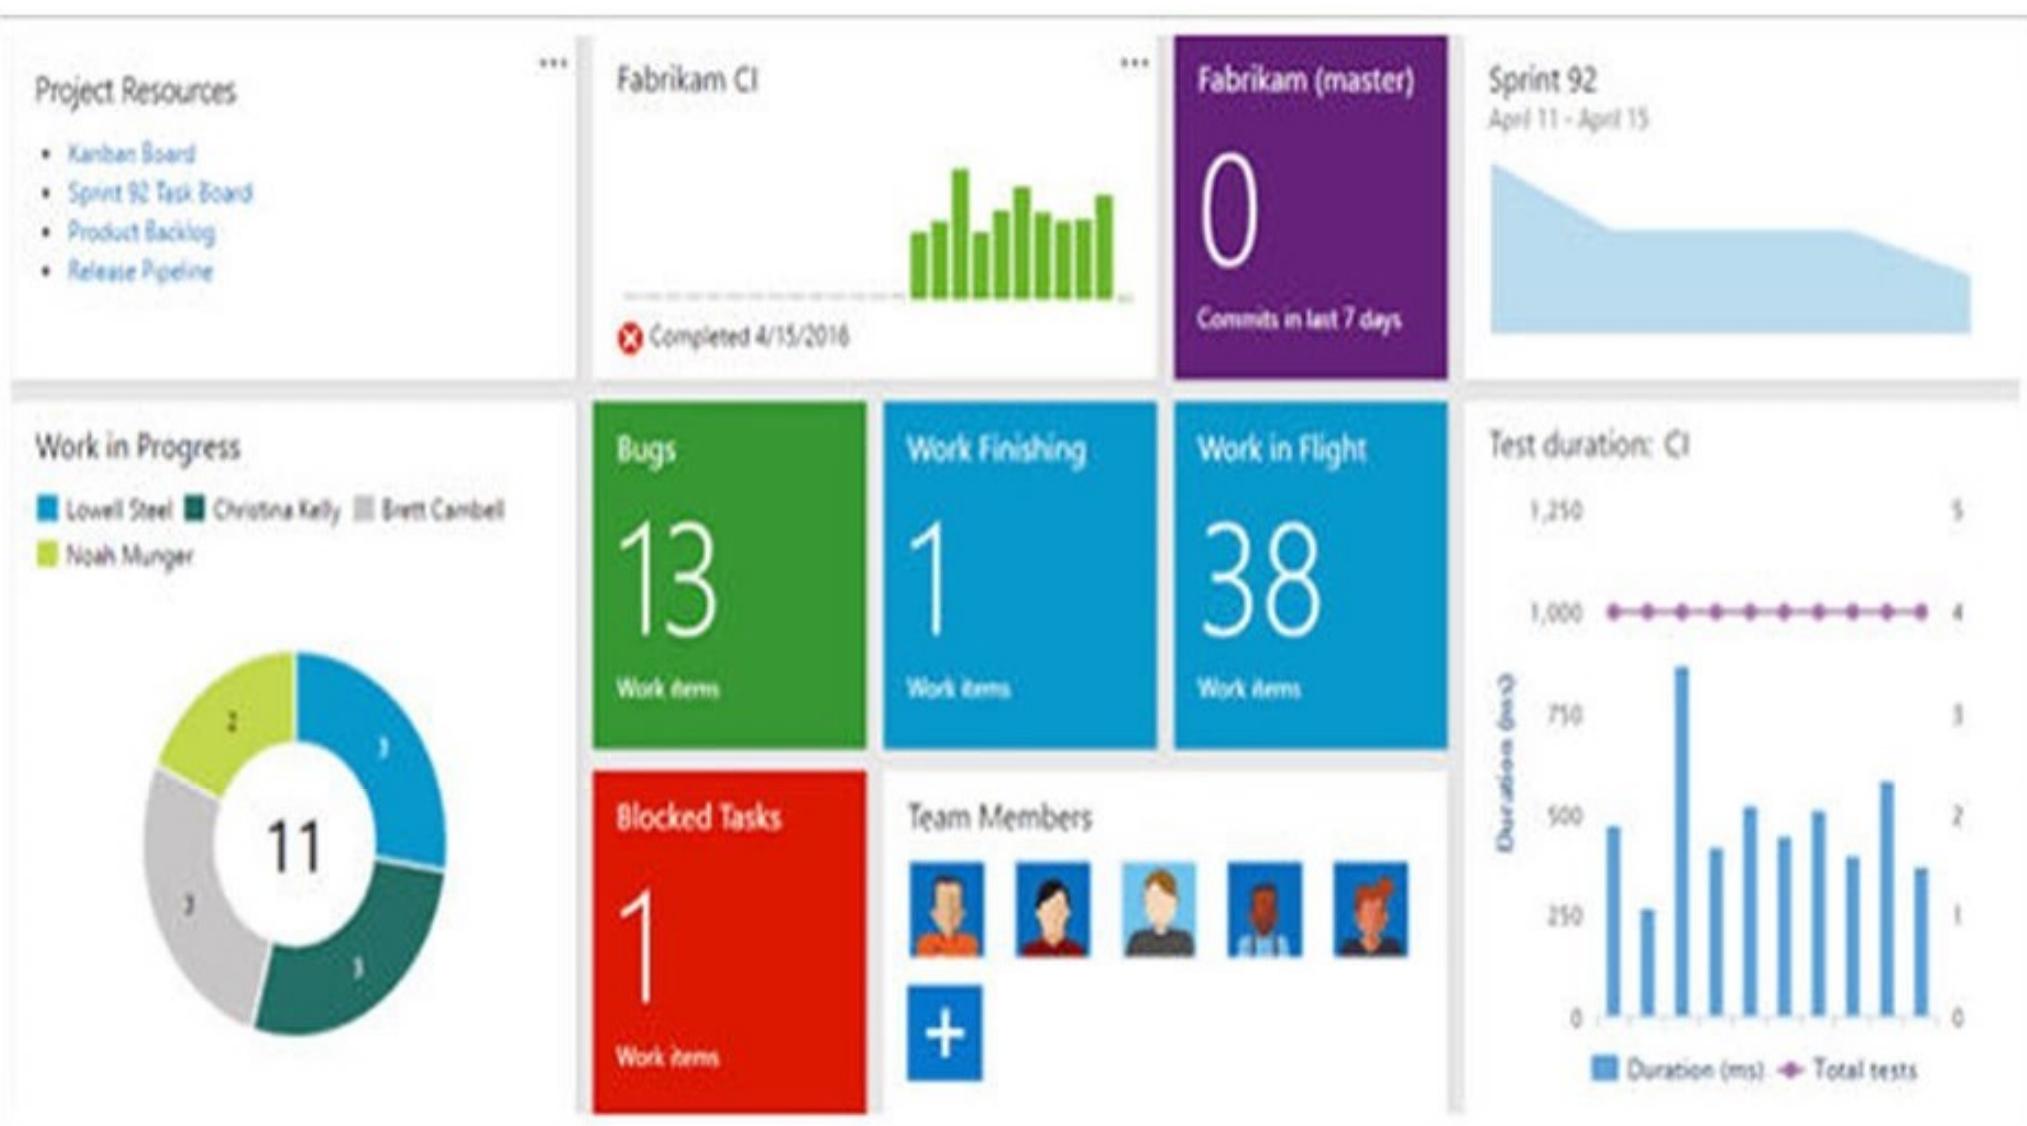

# Microsoft Visual Studio Team Services(VSTS)

## Tool Features:

- Flexible Kanban boards
- Unparalleled traceability through Backlogs
- Customizable dashboards
- Built-in scrum boards
- Connect to code- all code changes get linked directly to tasks/bugs.
- Offers continuous integration.
- Git client support

# Microsoft Visual Studio Team Services(VSTS)

# Microsoft Visual Studio Team Services(VSTS)

## Pros:

- A **complete & powerful** agile project management tool.
- It has **almost all the functionalities** that are needed to support scrum team – Backlog management, capacity management, Kanban, scrum boards, etc.
- **Build, test and release** steps can be **set up quickly**.
- **Easy to use** and graphically appealing.

## Cons:

- Available only on the web. No Android or iOS version is available.

## Pricing:

- Free for up to 5 users (with basic features)
- \$30/month for 10 users

# Icescrum

# Icescrum

## Tool Features:

- **Open source**
- **Scrum pillars to plan, collaborate and deliver better** – Item breakdown, Reports & metrics, Product backlogs, Roles.
- **Agile** – Roadmap, releases & sprints, defect stories, acceptance tests.
- **Integration with tools like JIRA, Jenkins, Redmine, Mantis, Trac** makes it support version controlling, bug tracking, continuous integration, IntelliJ IDEA.
- **Extensibility** – Custom Exports, Web services API, Embeddable HTML widget.
- **Collaboration through virtual task board**, sandbox, slack integration, instant messaging.
- **Simple administration.**
- **Management- advanced search**, team availability, project bundle.
- **Extra features in Pro version** – Icebox, cloud storage, create items from emails, feedback.

# SprintGround

## Pros:

---

- **Excels in task management**
- Great for software development projects.

## Cons:

- **No Gantt charts**
- **Lack of customization**
- **Limited file storage regardless of plan.**

## Pricing:

- Free up to 3 users, 2 projects with 50 MB storage.
- Starter: 8 users, unlimited projects, 1GB file storage - €24/month.
- Business: 20 users, unlimited projects, 2GB file storage - €59/month.
- Business: 21+ users, unlimited projects, 5GB file storage - €5/user/month.

# VersionOne

---

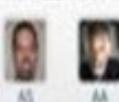

# Tool Features:

- **Supports methodologies** like scaled agile framework, Kanban, DAD, LeSS, Hybrid approach.
- **End to end visibility**
- Connects with software development ecosystem
- Management insight
- **Team simplicity**
- **Customizations**
- User story management
- Release and sprint planning
- Storyboard, task board and test board
- **Acceptance test tracking**
- Burndown and velocity reporting
